

PERFORMANCE PLUS HPFI provides the following benefits:

- Cleans and prevents injector deposits
- Prevents formation of black soot/sludge
 - Prevents premature filter plugging
- Provides thermal and oxidative stability
- Improves and maintains fuel economy
- Improves and maintains horsepower
- Reduces harmful exhaust emissions
 - Effective in Bxx blend up to B20
- Contains Dri Tek moisture control chemistry
 - Prevents corrosion
- Quality Assurance – testing program
 - PPC Service and Support

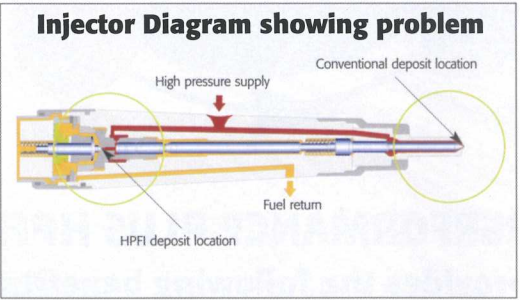

Petroleum Products Corporation

Why you need

Performance Plus HPFI

New High Pressure Common Rail Injection Systems that are on new diesel engines have created a new problem that you need to be aware of. Extremely high pressure and high temperatures in the system decompose untreated diesel fuel. This decomposed diesel fuel causes black soot-like deposits to accumulate in the fuel filter and also causes deposits to form in the injectors as shown below.

Fuel Injector Valve Plungers

Baseline no additive

Fuel treated with ECOCLEAN® HPFI Antifoulant

Denver fleet trial

Same make and model trucks, same fuel, same work load. The only difference is Performance Plus HPFI.

15,000 miles no additive

30,000 miles with Performance Plus HPFI
